Annwyl Parents/Carers

After the February half term, our school will be launching official social media accounts on Facebook and Instagram. These platforms will be used to share updates about school life and direct the public to our school website for more detailed information.

To begin with, children will not be featured on any of our social media posts. If this were ever to change in the future, parents would be informed in advance, and individual permissions would be requested for any child involved.

The main purpose of these platforms is to celebrate and publicise the great things happening in our school and strengthen communication with our community.

Please note that the Governing Body has adopted the Local Authority Social Media Policy, which outlines how we will manage these platforms responsibly. A copy of this policy is available on our school website for your reference.

Thank you for your continued support as we take this step to share our school's successes more widely.
